Design Guide

Sunshine Home Material is proud to accept your design requests as a free service to our clients. To make the process easier and to ensure accuracy, we have provided an easy to fill questionnaire that allows you to share important information as well as attach your legible design sketch. We have made it convenient for you to upload your design directly to us. Below you will see a typical submission of a design that we receive from a client that is missing some important information.

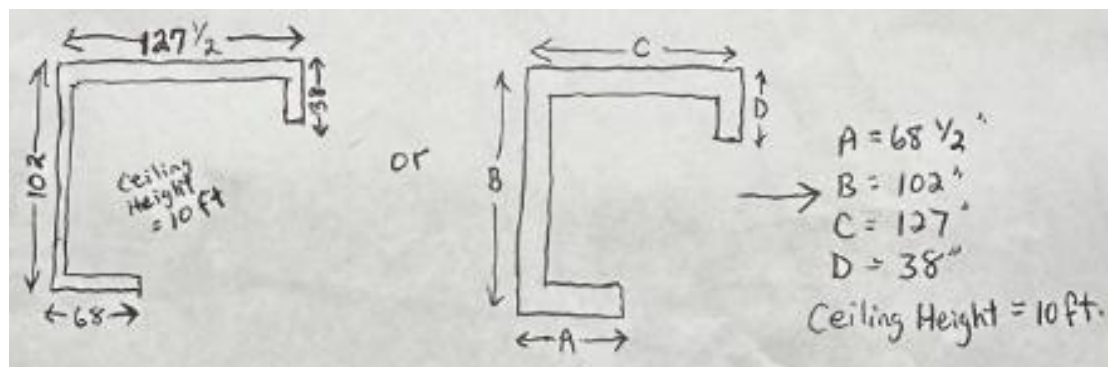

Included in the questionnaire provided, there are mandatory questions that need to be answered in order for us to be able to move forward with the design request.

This information includes...

- All Wall Measurements
- All Appliance locations & measurements Ex. range, fridge, dishwasher
- All opening measurements (Windows, Doors, Walkways)
- Cabinet/Countertop Style (If applicable)
- List any preferences or special circumstances

CONFIRMATION OF WALL MEASUREMENT IMPORTANT: Measurements must be verified by your and/or your contractor before proceeding with your design request and order. This verification of measurement can help avoid future issues such as: Wrong cabinet sizes, Not enough cabinets ordered, Having to extend your installation timeline, and having to spend more money to order the correct cabinets needed. It is important to note that any cabinets that are special orders, as well as any cabinets that have been assembled are non-returnable and cannot be exchanged. So accuracy in your measurements is extremely important.

Appliances - May include sinks, refrigerators, dishwasher, stoves/cooktops + ETC

- It's crucial we get the center dimensions of appliances as generally, the center is where we'll see plumbing or electrical that would normally get in the way of cabinets or could possibly skew the accuracy of the design.
- For Sinks + Ranges, we cannot proceed with the design until we AT LEAST have the center dimensions of these items
- Some appliances have a "Standard" or "commonly found" size, this helps OUR TEAM make educated guesses to assist in the design process, remember you must verify the measurements since we are not contractors.
 - Sinks = 33" W, 30" W, or 27" W are the most common sizes (the sink). Add 3" to find the base needed (works in most cases)
 - Dishwashers (DW) = 24" W x 34.5" H x 24" D (width most common)
 - Stove/Range = 30" W x 34.5" H x 24" D (width most common)
 - Refrigerator = 36" W x 70" H x 27" D (width most common)
- Windows - Also important is the measurement of the window, as well as the placement of where it is located on the wall. Is it centered with the sink?

****It is important to note that the floorplan that Sunshine Home Material provides is based on your measurements and is at a convenience only Sunshine Home Material will not accept any responsibility or liability for the accuracy of the measurements provided. It is the customers responsibility to review the layout and itemized invoice to ensure its accuracy****
